2. SECO 107B

Yahoo group: antiqueradioandelectronics
Date: 2000-09-24 16:05:49 UTC
From: scaledude_2000
Topic: 1 Message: 2

I recently purchased a Seco 107b in garage-sale condition for 20$. It seems to operate correctly and has the owner's manual. I've tested several disposable tubes in it and the results concur with my other tube testers. I am concerned with the validity of the owner's manual, however. For instance, a 6EU7 is listed as a 7 pin when it's actually a nine pin and can't be checked in the prewired sockets. Has anyone had any experience with this particular model?

8. Sparton Equasonne Radio

Yahoo group: antiqueradioandelectronics
Date: 2001-02-13 18:05:24 UTC
From: dyousett
Topic: 1 Message: 8

I am looking for information on a Sparton Equasonne Model 69 Radio.
I believe this was made by the Sparks Withington co in Jackson Michigan in the late 1920's or early 1930's.
I have a restored cabinet, but the radio itself is missing. I would like to find a radio to put in this cabinet, working or not.

Thanx Chris

14. Recently Aqquired... need help PLEASE...

Yahoo group: antiqueradioandelectronics
Date: 2001-06-07 09:50:30 UTC
From: Dynamic881964
Topic: 1 Message: 14

Hi ,
I recently aqquired a Wilcox Gay Recordio, Model 6B10. It was doa when it arrived. I soon found and solved that problem, mice had chewed several wires under the chassis. It does power up now, but has what I think might be "AC Hum " . What I need to know is where to get replacements for the filter caps, and all the other caps. Also need a 5Y3 tube and a microphone for this unit.
Any and All help appreciated greatly !
Thank You !

15. radio repair equipment, parts...auction

Yahoo group: antiqueradioandelectronics
Date: 2001-06-12 16:34:44 UTC
From: lonestar245
Topic: 1 Message: 15

There will be an auction in Dallas Texas this Saturday, June 16th at 10AM.
It includes lots of vintage radio diagnostic and repair equipment, radio and electronic parts, some early computer stuff, very early- (maybe original model?) Apple computer(s), lots of power tools, hand tools, etc....
If you have interest in attend, please contact me via email for further details.
if you know of a better place to post this message, please let me know, or forward it yourself. Thanks!

16. Eveready Batteries

Yahoo group: antiqueradioandelectronics
Date: 2001-06-27 05:30:45 UTC
From: bgraef
Topic: 1 Message: 16

i have recently aquired some oddball 45 volt
eveready batteries that are marked for "electronic
instrument use".I also have some strange looking everready
batteries in cardboard and tar containers. I think they are
9 volts or something and measure about 4"x3"x1 or
so. Can someone help me out..and tell me if they are
worth much? I am considering listing them on Ebay or if
anyone is interested in puchasing them ...I have about
10 altogether.
They all check out well on
voltagewise on an ohmmeter.

17. Re: Eveready Batteries

Yahoo group: antiqueradioandelectronics

From: bgraef
Topic: 1 Message: 18

Ok I have 3 number 415 9 volt ones, 12 No. 455 45
volt ones,3 number 736 4.5 volt ones, and 5 No. 206 9
volt"transistor" ones.
I found these in the dumpster of a large
electrical distributor.They are all in very good condition,
no stains etc. I think they just threw them away
because they werent selling, and taking up space.

19. Leeds and Northrup

From: alphawolf45
Topic: 1 Message: 19

Hello, I have collected and repaired antique electronics(radios and more recently test equipment) for many years.Interest has cooled off this past year so i am looking to chat with like minded folks to encourage a renewal of my interest.Anybody really get off on leeds and northrup or General Radio test equipment?For radios i am partial to Crosley battery sets <br>.

20. Anybody out there?

Yahoo group: antiqueradioandelectronics
Date: 2001-09-05 15:39:38 UTC
From: alphawolf45
Topic: 1 Message: 20

Allright i knew this site was about dead , but on the bright side theres plenty of room for new members like myself. I have a variety of interests in old electronics and considerable experience in restoration work.
When active in the hobby i am continually learning new things -from the project at hand, the books i consult, and the questions that i invariably ask my fellow enthusiasts.
I recently put up a metal building and put in flourescent lighting.Does anybody know a method to block the hum from the lights from interfering with A.M. radio reception?

21. VARIACS and Emerson Vanguard 888 4 sale

Yahoo group: antiqueradioandelectronics
Date: 2001-09-10 19:23:08 UTC
From: SevinDust_2k
Topic: 1 Message: 21

Hi Folks.. I have a Vanguard 888 (red)for sale
A couple of things..
It is missing the wire stand and the battery holder.. I tested the radio and it works great but the battery holder i used does not fit inside the radio like it's supposed to..
Has one small "melt mark" on the back like someone touched it with a soldering iron accidentally. This radio works and could be made nice again or you could use it for parts..

first $20 plus $6 shipping takes it.. I don't collect these..

email me at sevindust_2k@...

I also have a couple of 5 amp Variacs..

Thanks

37. Info on OLD TV ?'s

Yahoo group: antiqueradioandelectronics
Date: 2002-09-07 22:32:57 UTC
From: highoveryou
Topic: 37 Message: 37

I just got,as a gift, an old TV! I don't know the year, but here is the model Number: 9-TC-249(k) . It's an RCA victor set (serial # B1295970). When it's plugged in all the tubes glow, but it has no picture. I do here some sound change when the channels are selected. I was told later that I should not use today's power (unregulated), but this sounded a little odd.

If anyone knows of a site or can help, I'd be very happy! Please email me any help!

Date: 2002-11-04 07:21:34 UTC
From: dadfulltime
Topic: 42 Message: 42

I have an old TV that needs a home.
It is an old Hallicrafters with a small round screen. I found it at a yard sale a few years ago and was going to start a new hobby. But now I do not have time and need the storage space. It is full of spider webs and dust so I have not tried to plug it in. Fix it up or use it for parts. The price is right, FREE!
I was going to toss it out. But I'm hoping to find an enthusiast that would like to have it.
Sorry, I cannot ship. You must pick it up in Sunnyvale, CA
I just do not have time to package it or get to the post office.

44. New member needs help with Knight amp

Yahoo group: antiqueradioandelectronics
Date: 2002-11-24 02:43:03 UTC
From: gardndog
Topic: 44 Message: 44

Hi,
I'm hoping I've found the right group for my question...

I have a Knight KN940 stereo hi fi amp and can't find a schematic for it. The power section has four 6BQ5 tubes and coming off pin 9 there are two resistors in line to ground. One is a 100 ohm 10 watt resistor and the other is a 5 watt size, but is burnt beyond recognition. Pin 9 of each tube is coupled together with a wire on all four tubes, then these two resistors to ground. I could email a photo if necessary. I would appreciate any help I could get with this.

Thanks,
Ron

im located in hammond indiana 46324 the main
thing to look for is the old sets maily philco model
50-t series. if your not sure what the set is look in
the back and it will give you model number. also im
looking for old picture tubes 10bp4 12lp4 tubes!! ect
just stuff like this.

Topic: 57 Message: 57

I created this post to promote a new audio disscussion board called www.CollectibleAudio.com The board was created this week which means we have no one discussing audio as of yet. I would like to ask everyone if they would register and start posting on www.Collectibleaudio.com You can sign up and not even talk about Vintage Radio if you would like, but I would really like to get the support from the Vintage Audio community. Please do not think i am asking you to leave antiqueradioandelectronics, but I feel the more people talk, the more knowledge will be spread throughout the Audio community. If your moderator would like, I would be happy to put a link to your yahoo group. This way, we will both create new members.

Thanks so much,

Jonathan David at
www.collectibleaudio.com

64. Silvertone antenna hook up

Yahoo group: antiqueradioandelectronics
Date: 2003-07-28 13:41:04 UTC
From: jaxnd
Topic: 64 Message: 64

Perhaps you can help me. I have old Silvertone cabinet radio. I
think it is a 50's model because it has a plug for television and
phono in the back. I had the electronics repaired a few years ago
and I could pick up signals pretty well. I decided to have the
cabinet refinished and it looks great, but I didn't make good enough
notes on how to reconnect the antenna.
Ther are two wires coming from the top center of the chassis. The
will reach to the loop antenna, but nothing happens, no signal.
There are also two terminals "A" & "D" on the loop antenna. I then
connected two new wires from similar marked terminals to the loop
antenna. Still no signal.
I hear a buzz when I hold one of the wires but no station.
Any ideas?
Regards
Jackson D'Armond

67. New member looking for information on Radio Craftsmen and Hallicrafters hifi

Yahoo group: antiqueradioandelectronics
Date: 2003-09-19 03:30:06 UTC
From: Paul DeFayette
Topic: 67 Message: 67

Good evening,

I just joined the group while looking for information on Radio Craftsmen and Hallicrafters hifi gear from the 1950's. I am looking to purchase good copies of sales literature, owners manuals, and service manuals for the following mid century hi-fi items from Radio Craftsmen and Hallicrafters:

Radio Craftsmen C550 amplifier, C400 amplifier, 800 AM/FM tuner/preamp, 900 FM tuner

Hallicrafters A84 amplifier, ST-83 AM/FM tuner/preamp (Note: I did find the operator manuals for the A84 and ST-83)

I've already got the SAMS that are available for these. I'm looking for copies of the original manufacturers literature.

Also, any information you can provide about the Radio Craftsmen company and how involved Hallicrafters was with hifi in the 1950's. I didn't know Hallicrafters produced any hifi equipment until I found these two units.

Any assistance is very much appreciated. Thanks.

Regards,

Paul DeFayette

Topic: 68 Message: 68

Hello everybody. This is Ted Whitus,living near Watertown,New York in a rural setting just outside of Henderson,New York. I have been collecting and tinkering with old radios,tvs and juke boxes for over 45 years. One of my favorites is in my living room,and plays well. It is an All-American-Mohawk floor model,the cabinet was made by The Wurltizer company of North Tonawanda juke-box fame. The window dial says "Lyric". There isn't a model number,but the tube line-up tells me it was made about 1928-1929. It is a high-boy with the stretcher legs and the speaker is on the upper part with the window dial near the bottom. It has a fold-down door that slides in to make a nice hand rest while tuning.
I welcome e-mail letters from other group members who would like to talk about anything electronic. I collect stamps as well and am always interested in anything from Canada,USA,Latin America and world wide in general. Thanks,Ted.

Mark,
I had given up hope that anyone was going to respond to my request for info on that microphone. I would appreciate any basic info, such as a more exact vintage, or year of mfg. The s/n on mine is 5363 if that will help you. Since you just purchased one, could you give me some idea of it's value. I picked mine up at a yard sale. It is not in perfect shape. One of the mounting ears is broken off the body of the microphone, and it is missing three springs. I am just keeping mine around for a stage prop, so I haven't tried to make it work yet.
Thanks for replying.

From: Mark C. Brantner
Topic: 46 Message: 72

I can't really give you an idea of the value, but I can tell you that I paid $281.00 for mine.
I've seen similar style microphones on web pages with prices of $1,000.00
I do not collect them for value or as an investment. I buy them to use.
I'm sure you could get new springs for it.
I was going to check Home Depot today, to replace springs on a Universal X mic.
Not sure what can be done about the broken ear.
If you're just using it as a stage prop, you might want to get it re-chromed.
There's good money to be made in renting these out as stage props
I know of many businesses that exist very well just doing that.

Me, I like to hook'em up and record
Gotta have a transformer and a 6-volt battery with these though.

As for the Vintage?
The 3N, Shure's first mic, was introduced in 1925, the 33N in 1931.
Although, another source says that until 1932, Shure sold radio kits and the microphones were made by a smaller firm.
Shure made their own mic in 1932, a two-button Carbon (model not noted).
Also, that until 1928, the company was S.N. Shure, and that Shure Brothers did not exist until the brother joined the business.
I cannot find any mention of the 5B, but I wrote them to see if any info was available.
http://www,shure,com

At any rate, you're looking at a 1930's mic.

Hope this helps,

Mark

Doing further research, I find that the 5B has to either be a 1932 Microphone, as Shure Brothers came out with Condenser Mics in 1933 (40D), or it was made before 1932.
Errata: The original company name was not S.N.Shure, but Shure Radio Company.
I suppose with these published timelines, it depends on what the label on the mic says as to the company name.

Mark

74. All American Mohawk Lyric made by Wurlitzer

Yahoo group: antiqueradioandelectronics
Date: 2003-10-07 02:32:25 UTC
From: soulaflame7
Topic: 74 Message: 74

Hello folks:
I just uploaded 4 photos of a radio in my living room. It is an All American Mohawk Lyric made by Wurlitzer. There isn't a model number on it,but I believe it could be about 1928-1929. It has ten tubes,1-UX280,2-UX245's, and 7-UY227's. Does anyone know the correct model number???
The radio is a beautiful high-boy with stretcher base. It plays very well. I use a braided steel antenna wire about 20 feet long. It pulls in stations from 200-300 miles away even in the day time. It plays like it is a TRF without volume control.
For a TRF with an early dynamic speaker,it has remarkably good fidelity and base response.
It was given to us by the guy we bought our house from. He said it sat in his attic for 25 years. He had never plugged it in. When we tried it,we found several things wrong. The volume control had a number of dead spots on it and needed cleaning badly. It needed a new power cord,as the old one was crumbling. When we "fired" it up,one of the output 45's started flashing inside. I quickly put another one in I borrowed from a RCA Radiola 80 we also have. The Lyric started playing excellently. Well,I have rattled on long enough. Anyone who might have information and a schematic on this radio is welcome to correspond with me. Thank-you very much. Ted.

Rick
I have contacted a several guys that have a 12lp4 for sale.
Someone in the past has e-mailed me about needing one.
I finally found the info but now I cannot find their e-mail.

Please e-mail if you are interested and I will give you the info.
I am presently working on a Philco 50T-1443 and it needs a 12lp4.
I found a 12kp4 on E-Bay got it for a good price.But when it arrived
it was broken.
I know of a 12lp4 locally and hope to pick it up this weekend.

I have an elderly friend who says that he owned a Westinghouse black & white TV with a 60 inch screen in the early 1950s. I found that hard to believe. I searched the internet and found no mention of such a large TV screen being available back then. Does anyone have knowledge of such TV existing in the 1950s?

Tom

79. Heathkit TC-2 tube checker

Yahoo group: antiqueradioandelectronics
Date: 2003-10-27 15:19:21 UTC
From: patdiana869
Topic: 79 Message: 79

Hello all,

I hope that this is proper protocol, I just joined this group.

I have 3 questions about a recently purchased Heathkit TC-2 tube checker.

1. What is the general procedure (in sequence) for checking a tube?

2. What is the function of the "SET LINE" rotary switch?

3. There is a series of toggle switches with corresponding letters of the alphabet. Apparently, to test a particular tube, they must be left in the middle, or toggled up or down. The tube chart, when displaying what letter(s) of the alphabet to toggle DOWN, shows one letter in bold type. What is the significance of this?

Thanks for any help that may be forthcoming.

Pat O'Connor

Pat:
Hello from Ted,another new member. The purpose of the line set switch is to adjust the tube testor for fluctuations in the line voltage,so as to give you a complete accurate reading in your tube output being tested. If the line voltage was either too high 120V+ or too low,less than 110V,the reading would be off. Low line voltage would show what might be a "good" tube as having low emission.Etc. Most good tube checkers have an adjustment for this.
As far as sequence in testing a tube,most testers have functions that test for "gasseousness" which results in distortion in an audio circuit,etc. Usually a gassy tube will glow blue when in the chassis. Shorts is another test. Any short involving the internal electrodes of the tube will make the tube unusable. Usually there is a "neon" light attachment on the tester for this test,and when the lamp glows red,there is an interelectrode short. Tube emission is the usual test. If the meter reads in the "good" area,the tube probably can be used.
As far as how your tester is set up,your instructions with the testor should give you their sequence for testing. I hope this information has been helpful. Thanks,ted.

From: Richard T. Ammon
Topic: 81 Message: 81

If you're interested in seeing Eddy Swynar's Retro 1929 QST Super 12,
visit "The Rolls Royce of Receivers" web site
(http://www.SuperHets.Info) and go to the Gallery pages.

Better yet, click here... http://www.superhets.info/page7.html

Then, look over our entire early Super Hets web site!

We've documented over 600 brands and models of Supers from 1918 to
1930. This comprehensive list will be added to the site soon.

We're always interested in documenting any Super Het you might have.
All in preparation of a series of Super Het books.

Thanks,

Vicki & Rick Ammon

95. URGENT: Old TV parts-Need to sell ASAP!

Yahoo group: antiqueradioandelectronics
Date: 2004-03-11 11:45:49 UTC
From: marliesus
Topic: 95 Message: 95

Hi,

I got 2 lots I'd like to get off my hands to someone who can
appreciate these more. :)

1>A small lot of TV components all in their original packaging:

-600V 1A Microminiature Diodes
-6.2V,9V12V,15V 1W Zener Diodes
-NPN Darlington Transistor
-transistors
-silicon rectifiers
-globar resistor
-germanium diodes
-resistors
-transient suppressors
-degaussing coil Model TDGC-1
-plastic design template for electronic components 1:1 scale
-Direct Etching Dry Transfers 12 sheets

2>Electron tubes
Have over 50 of these tubes from Raytheon,Pro/Comm,GE,International
ServiceMaster,RCA,Sears,Compactron/GE,Sylvania,Sarkes,Magnavox,Westing
house,Zenith,Silvertone
and Admiral as well as unknown brands.

I have no idea of these tubes work or are duds, but I would like to
sell the lot cheap to someone who could maybe make use of them.

LMK if interested in any of these lots.

Thanks,
Marlies

From: cs1275
Topic: 115 Message: 115

Thanks Steve, but the DIEHL you sold is a bit older than mine. My DIEHL is at least 1941 (I did find out that they move part of the co. to Finderne NJ in 1941 which is the city listed on the badge) and it is a floor stand model with a 12" blade diameter and a 14" cage diameter. It extends up to about 7'6" and has a cast iron base.

HI Group,
I recently acquired a 1930 Philco Model 77 Lowboy console radio. (
See Photos)It is like the one in the photo album I just posted. I
need tubes for it, it takes numbers 24, 27, 45, and 80.... where can
I find these ? Are they being reproduced ? I will be without
internet access for about a month, should be back on 02-01-05.
Any help appreciated. I do have a variac to use to bring the power
up slowly.
Thanks
Dave

117. G & F Supply Company, Chicago -- 1930's Searchlight

G & F Supply Company, Chicago -- 1930's Searchlight
radio or Disk-shaped Radio

Re: G & F Supply Company, Chicago -- 1930's Futuristic
Wood Radio has
been called the "Searchlight radio" by some or
"Disk-shaped Radio by
others."

From: "Chris Murray" <mwmwmfilms@...>

Please feel free to email me if you know anything at
all about this radio or if you have one. It is missing
a tube and I am trying to find out what it was. I also
would love to know what value it has -- I have been
told it is "quite valuable." It is a really funny a
interesting design. Something from the 1933 Chicago or
1939 New York World's fair. It looks and turns up and
down and side to side, just like the tourist quarter
binoculars at the Statue of Liberty or Emipire State
Building. What I have been able to find is listed
below. Thanks to all who have emailed me from other
lists as well as from this list. there is little or no
info on these sets. It is very very rare. I would love
a copy of any articles or pictures from those cited
below. I would also buy a schematic if there is such a
thing on this set.

Please see picture of radio at link below or email me
for picture:

http://photos.groups.yahoo.com/group/oldradioparts/vwp?.dir=/&.dnm=G+%26+F+Supply+Company%
27s+radio.jpg&.src=gr&.view=t&.hires=t

Best,
Chris Murray

Patrick Franzis <old_radios@...> wrote:

Hi Chris,

I'm still researching.. Can you send me any
information that is on
maybe a metal plate in the back? The tubes you have in

it 1-6A7,
1-25Z5, 1-75, 1-78 make me think it is not the General
TV and Radio
5A5 as one of the below references say, as this
chassis was made with
post-war tubes like 12sk7, 12sq7 etc. I remember
reading the article
you copied in Antique Radio Classified a while ago,
that's where I was
trying to find (from the back of my mind) when you
described it. I
then found a picture on the web. Thanks for the tube
line up, that may
help identifying it. It was most like made by one of
the many shops in
Chicago and then resold under a different name. By the
way- it's quite
valuable.. Where did you find it?

--- Chris Murray <mwmwmfilms@...> wrote:
Subject: Re: Fwd: Re: Please help figure out what
radio this is.

Hi Patrick,
I don't know if you got my other email but I am very
impressed that
you found it. Since you led me in the right direction
I came up with
these web citings. I really need to still find a
schematic, a tube
list if nothing else and a value would be nice. I only
have 4 of the 5
tubes (1-6A7, 1-25Z5, 1-75, 1-78 missing the other it
has a ballast
marked triad and a 6pin tuning eye.) Below are all the
excerpts that I
could find on the web, I tried emailing to those
mentioned but who
knows if that will work.

Thanks for your help!
Best,
Chris Murray

Found on the web

==========
Disk-Shaped Radio Help ID

Dear Editor:

The unknown radio shown in your Photo Review, February'97, p. 13, and again in the March 1999 issue, p.15, is a General Television Model 5A5 "Spy Radio," ca.1938. It appears to me to have Detrola knobs, possibly made for the company by Detrola(?). I have this radio and mine has a sticker on the front saying "GF Sales Co., Chicago, Illinois."--Jim Hauskins, Bloomington, IL

==========

Dear Editor: In the March 1999 issue of A.R.C., a disc-shaped radio is shown asking for the identity of the manufacturer. I have the same radio. On the back is a metal plate with the following information: "Licensed under patents of Radio Corporation of America, General Electric Company, Westinghouse Electric & Mfg. Company, Hazeltine Corporation." There is also a sticker on the back which reads: "G&F Radio Patent applied for. For maximum efficiency for local and distance reception, add 15 to 25 feet of aerial. For foreign reception add 40 to 50 foot outdoor aerial." The serial number for this unit is 25-174958. I hope this information is helpful. --J. Melvin Isett, Huntingdon, PA

==========

Following these leads reveals an example in "Machine Age to Jet Age II " by Mark Stein on page 148. And yet another can be found on the cover of the 1997 tube catalog of Electron Tube Enterprises, Essex, Vermont, which clearly shows the G&F Sales Company, Chicago logo on the lower portion of the disk. It appears that the mystery is now solved. (Editor)

> Dave, you can buy them from several places such as
tubesandmore.com, radiodaze.com to name a couple, or you can find
them on E-Bay if you want to take the the time. You can bring up the
77 slowly with the variac and it might work, but it's most likely the
electrolytics are dried up and it will produce a 60 cycle hum. I
always replace the electrolytics first thing when I get a old radio,
and then check it with the variac. You may find that the wax caps and
the Philco block caps sometimes may need to be replaced /or rebuilt
as well.
Good Luck, Martin.

Well a lot of people will be interested in this. Where are you? Anywhere near Toronto I will run right over and take them off your hands.

All kidding aside, you may have a small fortune or a pile of junk. If you have been following this group just of late there has been a lot of talk about some tubes being worth a lot of money. On the other hand most tubes are worth very little or not worth the energy to throw them against a wall. It all depends on the numbers on the tubes (if you can read them) and whether the tubes have life left in them (most do or they would have not been kept).

In general the same is true probably to a lesser extent of the other components. I am sure almost anyone in this group could do a pretty good appraisal of what you have. The best thing would be if you had a digital camera and could post or send pictures. If the tubes are in boxes and the numbers are readable we can get an idea of what's there.

The next step is cashing in. This sort of stuff sells on eBay all the time. The trick is knowing what to put up for auction. One approach would be just to sell the whole thing as a lot but you can get more by cherry picking. You will need a digital camera to play eBay. The other approach would be to find a junk (antique) dealer in your area and sell the lot. It is best to know the value if what you have because they are in business to make money off you.

Post or send some pictures or list the tube numbers. I am sure lots of people will respond. Some may offer cash on the spot.

Got any Mullard 12AX7's or 2A3's?

Michael

First, I'd find a TV repair shop, (preferrably an older one that might still have a tube tester) and get them tested for useability.
Spereate the good from the bad and if the TV shop doesn't off you something for them, try eBay!
The bad ones... I believe there are companies that by bad tubes and refurbish them.
I don't have any more info than that.
You could do a search on the web for "used tubes" or "refurbished Electron tubes"...
something along those lines.

122. Whole box full of radio tubes in original boxes & a little misc for sale

Yahoo group: antiqueradioandelectronics
Date: 2005-04-15 16:11:35 UTC
From: Terri Smith
Topic: 122 Message: 122

Hi again,

I sorted through the radio tubes and I have 34 in the original boxes and 13 more that have either fallen out of the box or didn't have a box. I would prefer to sell them as a lot and would like $100 plus shipping. That would make them just over $2 each. Plus a whole jar of clips or connector "thingies".

Here is the inventory list -

Raytheon
50L6GT
50X6 (3)
6K6GT
1U4
5085

Concert Master
1T4 (3)
3S4
1R5

Concord
D199705

Delco
35Z5 GT/G

Extent
50L6GT

Tung-Sol
50X6
35Z5GT (5)
12SA7GT
IS5
35W4 (2)

RCA
12SK7
50X6

Sprague
AB-1108

GE
12SQ7 (2)

NU
35Z4GT
7E7

Cunningham
35Z3

Hytron
12SQ7GT

I used to get that on an old Sonar FS-23 (Tube CB Radio) when I lived on a
certain street in Chicago.
I take it that the buzz is regular in length as well as spaced apart?

Best I could figure out was that it was coming from the streetlights, or
there's some new EMI near you, like an unshielded alarm system.

Hi,

Wondered if anyone knew anything about the company Eagle and specifically the amplifier AA6 (I would imagine early to mid 70s). One has come into my posession and it's in absolutely perfect condition. I was told that Eagle became Pioneer - is this true?
Any information much appreciated.

From: caudill_tl
Topic: 128 Message: 128

I recently picked up pioneer's first separate stereo (1963). The cabnets are in great shape. The two tuners seem to work well; however, the needle is skipping across the records at the begining of each 33 speed. It's most likely something simple to fix. Any advice? I was really excited when the elderly gentleman brought out the original pioneer boxes. What's the odds?

Sounds nice.
I suppose it's pre-"Anti-Skate" technology, so it could be the weight of the tone arm being too light.
Does it have the original cartridge or did you have to put a new one in it?
Chances are that if you put a new one in it, it is far lighter than the old workhorses.
Tried and true technology for this is tape a penny above the cartridge.

Check under the tone arm to see if there are any missing weights (It's probably a shell style arm and you can see the wires underneath inside.)
If there is a weight present, see if it is adjustable... slides to put more gram force on the stylus.
If it's an original stylus, make sure it's not a 78 size and make sure it actually has a diamond.
I think Pfenstiel is still making old-syle styluses.

One last thing... Records made after... 1965(?) had much smaller grooves (some called it "MicroGroove").
It probably had to do with improvements in cutting and improvements in plastics.
So, find a really old LP, and if needed, clean it up with some Dawn dish detergent, lukewarm water and a soft, lintless cloth and rinse really well.
Using demineralized water is also a good idea
Don't get the label wet though.
